DATA FILES

Data files recently released are listed below. They are sold by Customer Services unless otherwise noted. (Sales are final-with the exception that defective products may be returned within 90 days. Contact Customer Services before returning an item.)

The cost of new files on computer tape generally is based on the file size, with the minimum charge being \$175. The files are offered on tape reels or tape cartridges.

Data files also are offered on compact disc-read-only memory (CD-ROM), a 4 3/4-inch laser disc. The price for a mass-produced CD-ROM, prepared for popular files, generally is \$150.

CD-ROM's also can be prepared on request for other data files otherwise available only on tape reel or cartridge. The cost for such CD's is the same as the cost for the tape file. The CD files are ASCII copies in the same format as on tape, and they are not accompanied by software. Since the discs are specially prepared in response to customers' requests, orders take about three to four weeks. For further information about this service, contact Customer Services.

Files available on diskette ("floppies") for IBM and compatible microcomputers also are listed.

An ever increasing variety of data files and product information (including this publication) can be accessed via the Internet. (See "How to Order" on page 10 for more information.)

Some files are exclusively online, such as those listed in the "Online Data" section, below.

Technical documentation, included with each file order, also generally is available separately. The price varies.

Free *Data Developments* booklets provide brief descriptions of most files. They may be requested from Customer Services.
